

Risk Management Summer Course

Mon 9th – Wed 18th July 2018 (TU Delft, The Netherlands)

Get ISO-certified for a fraction of commercial rates.
Update your business knowledge of the world's leading ISO standards on Risk, Information Security and Business Continuity

Risk Management Summer Course

Mon 9th – Wed 18th July 2018 (TU Delft, The Netherlands)

Get ISO-certified for a fraction of commercial rates.
Update your business knowledge of the world's leading ISO standards on Risk, Information Security and Business Continuity

Due to our unique TU-Delft supported program, our fees are on average 50% below market rates.

Optional **Foundation** and/or **Advanced ISO exams:**

- ISO31000 (Risk Management)
- ISO 22301 (Business Continuity)
- ISO 27001 (Information Security)

Get ready for 'real world' threats

Super practical multi-faculty 1¹/₂ week program at the start of summer 2018

3 European Credit Transfer System (ECTS) points*

Learn from corporate and academic (incl international) guest speakers, how to protect an organisation against flood, cyber, supply chain, aviation, chemical and other risks, and achieve better Business Continuity.

This annual Summer Course is always refreshed with the latest best practice and case studies. It's the perfect way to familiarise yourself with real-life business risks, and how to implement controls to reduce their impact and likelihood.

Week 1 of this special program features the popular world standard on Risk Management (ISO 31000) and Business Continuity (ISO 22301) including a disaster drill exercise that enhances participants' scenario planning skills.

Week 2 (Mon-Wed) covers Information Security Management (ISO 27001) including cyber crime case studies and a data breach simulation game.

The ISO exams are governed by the world wide established **Professional Evaluation and Certification Board (PECB)**, providing you with the latest international credentials after passing the exam and getting global certification.

** To earn the full 3 points, full 1¹/₂ week attendance and a case study post program is required.*

Monday 9th July – Wed 18th July 2018

Delft University of Technology

Week 1: Risk Management & Business Continuity

In week 1 (9-13 July), we will discuss generic Risk Management and Business Continuity principles, hear from international guest speakers on a range of relevant threats and study the ISO 31000 and ISO 22301 standards

Highlights include:

- Risk and Crisis Communication
- Business Continuity & Contingency Planning 'best practice'
- Simulation games
- Flood risks including forecasting
- Aviation risks including examples
- Risk calculation methods
- Supply Chain risk management
- World-class experts sharing their specialised knowledge
- ISO 31000 & ISO 22301 global standards covered in detail
- Exam training and up to 2 optional ISO exams (Foundation and/or Advanced)

**Includes two
ISO exams
(choose
Foundation OR
Advanced level
of each), to
obtain global
certification &
international
recognition**

Week 2: Information Security Management

In week 2 (16-18 July), we will discuss Information Security Management including cyber threats, hear from international guest speakers on the latest developments and study the ISO 27001 standard

Highlights include:

- Cyber Security case studies
- ISMS (Information Security Management System) approaches
- Information Security controls
- The ISO 27001 global standard
- An interactive security breach simulation game in teams
- A range of corporate and academic, national and international guest speakers and participants
- Exam training, sample exams and optional ISO certification exam (Foundation and/or Advanced)

Includes the ISO exam (choose Foundation OR Advanced level), to obtain global certification & international recognition
