

## **Cybersecurity solutions from the Netherlands:**

*reliable technology & integrity by design*

**31 May – 1 June 2023**

**NL** Netherlands

**Let's move  
towards a safer  
digital world,  
together!**

The Netherlands is seen in Europe as a frontrunner in cyber security with a strong ecosystem for research, startups and experts. As home to the largest cyber security cluster in Europe, with more than 2,000 companies active in the cyber security sector, we offer a wide variety of reliable solutions. Being the world's most connected country with highly digitised industries, the Dutch have broad experience in complex security issues and multidisciplinary collaborations. And with Europe's digital gateway as a breeding ground for talent and innovations, our expertise is called upon worldwide.

And today we are here, in Sweden. To offer you our state-of-the-art knowledge and help you meet your digital security challenges with our inclusive advice, products and services. Whether you are looking for a managed service provider to whom you can outsource your cyber security or a reliable solution ranging from Security Awareness, Data Protection, Identity and Access Management, IoT Security and OT Security, ANGOKA, Arda, BlueFinch-ESBD, CRYPTAS, Cyber4Z and Secura are your trusted partners.

**Want to get in touch with us? Please find our contact information in this booklet. We look forward to working with you!**

# Get to know the companies

## Angoka

**ANGOKA**

ANGOKA is a Smart Mobility and Smart Cities security company headquartered in Belfast with offices in London and The Hague. ANGOKA ensures the safety and resilience of machine-to-machine (M2M) communications. ANGOKA's embedded technology creates trust between devices to allow them to communicate securely over untrusted networks, providing security for their users regardless of the network they use.

### What can we offer

ANGOKA creates a unique, immutable digital identity for devices that need to communicate with and be trusted by other devices or systems, across their appropriate networks. Our technology assures that the device integrity and the data it generates can be trusted and is actionable.

### Our ambitions in Sweden

Engaging with this opportunity will assist in providing context of the eco system in Sweden. This will create valuable opportunities for the acquisition of new clients through networking as well as the development of important business relationships and partnerships for commercial contracts.

## Arda

**ARDA**  
GAMIFIED AWARENESS

We are a cyber security awareness company based in Zoetermeer, The Netherlands. We have built our own digital learning platform where we help companies to lower the risk of cyber attacks. With our unique approach and positive, human-centered tools we are among the top performers. Several Ministries, local governments organizations, Universities, Departments of Waterways and Public Works and commercial organizations highly value our services.

### What we can offer

We deliver SAAS-based services that we can offer for the Swedish market in close cooperation with a local partner. We want to share our winning strategy and explore the possibilities to expand this formula together.

### Our ambitions in Sweden

- Talk with our target market (Educational institutions, governments)
- Talk with potential partners (Tech companies, tech vendors)
- Test whether our approach is attractive
- Find out what the target group is thinking and looking for in a solution

## BlueFinch-ESBD

At BlueFinch-ESBD, we manage and secure critical information for our clients. Our team of enthusiastic and highly driven security specialists help organisations to manage and secure sensitive information, and protect against data loss, theft and non-compliance. At the same time, we ensure the companies meet various industry standards and regulations.

### What can we offer

BlueFinch-ESBD offers secure data protection and integration solutions for organisations across all industries.

### Our ambitions in Sweden

BlueFinch-ESBD is considering the possibility of establishing a presence in the Nordic region, and Sweden seems like a promising choice. We are interested in learning more about the experience and dynamics of operating a business in Sweden.

## Cryptas

CRYPTAS is a turnkey solution provider within cybersecurity, a niche player with an unrivalled knowledge and specialized experience in the fields of PKI, strong authentication, encryption, lawful signatures and digital identities.

### What can we offer

At CRYPTAS, we implement our own solutions around Digital Signatures, Virtual Smart Card, clientless Smart Card access, Self-Service Processes, PKI and OCSP+. CRYPTAS specializes in the fields of PKI, strong authentication, encryption, lawful signatures and digital identities. As such, CRYPTAS can deliver the portfolios of our partners Thales, Keyfactor, Entrust and Intercede as turnkey solutions, with hardware-, software-, service- components and implementation. Added to maintenance solutions and SLA's, CRYPTAS runs the online [www.cryptoshop.com](http://www.cryptoshop.com)

### Our ambitions in Sweden

- Gaining traction on the Nordic market and create a firm multi-vertical customer base
- Establish solid partnerships with our existing allies
- Forge new alliances with multipliers and stakeholders
- Create increased brand awareness

## Cyber4Z

Cyber4Z started in the Netherlands in 2015 with two specialists experienced in the cybersecurity domain. We now have a team with capabilities in the field of strategic and tactical design of cyber security, IT and Privacy. Since 2022, Cyber4Z has expanded to Sweden by registering Cyber4Z Nordics AB. With our expertise and experience, we can guarantee the business objectives of our clients.

### What can we offer

Cyber4Z Nordics offers consultancy with implementation of ISO27001 based standards, risk assessments, awareness and training. Cyber4Z also offers technical assessments: Penetration testing, Phishing, Red Teaming, O365 and threat analysis.

### Our ambitions in Sweden

Our ambition is to expand our business and the company using our registered company Cyber4Z Nordics AB and help Swedish clients to mitigate their risks by improving security and compliance. Cyber4Z Nordics AB will initially deliver using capacity of Dutch consultants, but aims to hire local resources.

## Secura

Secura is a strong, independent competency center in cybersecurity. We exist for more than 20 years, have about 150 employees and help our clients to raise their cyber resilience. We are part of the Bureau Veritas group, who is already active in Sweden for long time.

### What can we offer

Our mission is 'raising your cyber resilience'. We do that by providing Advisory & Audit, Testing & Certification and Awareness & Behavior services (people, process, technology). In that we cover IT, IoT and OT systems. In our work we help our clients to make cybersecurity more tangible and link it to international standards and regulations.

### Our ambitions in Sweden

We like to grow our business in Sweden, by finding clients and helping them to raise their cybersecurity level. For instance

- Critical infra companies (to comply to NIS-2 directive)
- Financial services companies (to comply to DORA)
- Automotive manufacturers (to comply to R155/R156 and ISO 21434)
- Industrial IoT manufacturers (to comply to IEC 62443)
- IoT manufacturers (to comply to EN 303645 or to Common Criteria)

We have two business developers active in the Swedish market.
