AGENDA HIGHLIGHTS

The forum features innovation spotlights, live technology comparisons, and high-level executive networking concluding with excellence awards and a private cocktail reception.

An exclusive executive forum addressing the cybersecurity priorities defining 2026. The agenda centers on AI-driven and autonomous threats, GenAI security, deepfakes and digital impersonation, and the rise of AI-enabled Security Operations Centers (Autonomous SOC's).

Through visionary keynotes, expert panels, and closed-door roundtables, leaders will explore identity-first zero trust, real-time exposure management, data resilience and sovereignty, and regulatory readiness for the EU AI Act and NIS2. Critical focus areas also include securing AI systems, OT and IoT at the intelligent edge, and quantum-ready cryptography.
